01

Who We Are

About Us

Profile

TP-Link is a global multinational group in consumer networking, consumer electronics, enterprise networking, enterprise security, software, and cloud services.

With humble beginnings in 1996, TP-Link has grown to what it is today, a global leader. The company has dual headquarters in Singapore and the United States, and 42 global branches. You can find our Reliably Smart devices connecting billions of users in over 170 countries and regions with cutting-edge technologies.

With independent sub-brands such as Tapo®, Kasa®, Omada®, Aginet™, and VIGI®, TP-Link is dedicated to delivering reliable, high-performance, convenient products and services to global users. Embracing professionalism, innovation, excellence, and simplicity, we aim to assist our clients in achieving remarkable global performance and enable consumers to enjoy the wonders of technology.

Vision

Pursue Excellence. Explore Possibilities.

TP-Link®, Kasa®, Tapo®, TP-Link Omada®, Aginet™, and VIGI® are trademarks owned by TP-Link.

Dual Headquarters

TP-Link established dual headquarters in Singapore and the United States. Its Singaporean headquarters, TP-Link Corporation Pte. Ltd., established in 2005, serves as the holding company for operations. Its US headquarters, TP-Link Global Inc., oversees products and marketing and operates an R&D center. TP-Link Global Inc. officially commenced operations in Irvine, California in February 2023.

Omada — The Cloud Networking Solution for SMB/Enterprise

TP-Link Omada provides one-stop access to high-quality services and high-performance products for small and medium-sized businesses, integrating complete network devices such as access points, switches, and gateways. It's ideal for use in offices, hotels, schools, restaurants, and more.

Omada

B2B Focused Brand

The Greek word for “Team”

Why Choose Omada — Comprehensive Product Options

Omada Controllers

Cloud-Based Controller

Unlimited Scale

- OC200: ≤ 100 APs + 20 Switches + 10 Gateways
- OC300: ≤ 500 APs + 100 Switches + 100 Gateways
- OC400: ≤ 1000 APs + 200 Switches + 100 Gateways

Software Controllers

Unlimited Scale
(Recommend: ≤ 10,000)

Hardware Controllers

From 100 to 1,000
APs*

Omada Access Points

- Ceiling Mount / Wall Plate / Outdoor / Wireless Bridge / High-Density / GPON
- 10G / 2.5G / GE / FE Ports
- Wi-Fi 7 / 6 / 5 / 4

Omada L3/L2+ Managed / Smart/Easy Managed Switches

- Core / Aggregation / Access Switches
- 25G/ 10G / 2.5G / GE / FE Ports
- PoE++ / PoE+ / PoE

Omada Gateways

- 10G / 2.5G / GE
- Wired / Wireless / 4G+ LTE
- SSL / WireGuard / IPSec VPN / OpenVPN

Easy Smart & Unmanaged Switches

- 10G / 2.5G / GE / FE
- PoE++ / PoE+ / PoE
- Rackmount / Desktop / Wall-Mounting

Accessories

- 25G / 10G / 1G SFP Modules and Cables
- Media Converters
- PoE Adapters
- Power Supply Module

Note: Omada Easy Smart switches, Unmanaged switches, and accessories do not support Omada SDN central management.

Why Choose Omada — Longer Product Warranty and Superb Support

Longer Product Warranty up to 5 Years

Omada Controllers, Gateways, Switches, Indoor Access Points
5-Year Warranty*

Omada Outdoor Switches, Outdoor Access Points, Accessories

*Go to <https://www.tp-link.com/us/support/replacement-warranty/> for details. Warranty may vary between regions/countries.

Superb Pre-Sales Services

Certification and Training

Entry-level, associate-level, and professional-level training and certifications are provided.

Tailored Network Deployment Advisor and Design Center

Customized solutions tailored to your unique business needs with professional tools.

Professional Site Surveys

Evaluate customers' unique networking needs from the Omada professional support team.

Superb After-Sales Services

Dedicated Omada Support

SMB Hotline, Email, and Live Chat.

Official Omada Community

Timely Q&A and authoritative information supply.

Localization Support Teams

Multiple localization teams

What is Omada Best For — Verticals

Office

TP-Link United States
Omada for the whole office

*Due to regulatory limits on spectrum, the 5 GHz band of the Wi-Fi 7 access point EU version cannot have 240 MHz bandwidth, hence the theoretical speeds of the EU version in the 5 GHz band is ~67% of the corresponding US version.

Find the Best 25G/10G/2.5G Multi-Gigabit Managed Switch for You

Omada Managed switches with 25G fiber, 10G fiber, 10G copper, or 2.5 Gbps copper are available to fit many deployment scenarios. They provide high performance, scalability, and cost-effectiveness that business customers need from their multi-gigabit networking solutions.

Omada Gateways

Reliable Business Gateways

Omada gateways cover the needs of the SMB market and provide entry-level to premium options. Proven through use, their reliable performance ensures stable, optimized operation.

Enterprise 10G Gateway Ensures Fast Connectivity

The Omada VPN router with 10G or 2.5G ports supports high-bandwidth aggregation connectivity. ER8411 features two 10G SFP+ ports (1 WAN, 1 WAN/LAN) while ER7412-M2 and ER707-M2 feature two 2.5G RJ45 ports , it is ideal for enterprise-level businesses, schools, hotels, and large-scale deployments.

25G/10G/2.5G Multi-Gigabit Managed Switches

Omada's multi-gigabit managed switches are equipped with 25 Gbps fiber, 10 Gbps fiber, 10 Gbps copper, or 2.5 Gbps copper ports. This flexibility provides maximum performance and low latency. Easily establish reliable and lightning-fast connections to Wi-Fi 7/6 access points, storage servers, and other switches and devices.

Multiple Hardware-Level Protections Ensure Continuous Operation of Equipment and Stable Network without Disconnection

①

3+1 Redundant Intelligent Fans

Field-replaceable and hot-swappable fans with intelligent fan speed adjustment capability ensure high-efficiency heat dissipation for maximum performance and less noise.

②

Optional 1+1 Redundant Power Supply

Field-replaceable and hot-swappable power supply modules ensure constant network connections even when changing power modules

*Ships with one PSM550-AC module by default, and another field-replaceable redundant power supply requires a separate purchase.

③

Two Flashes for Redundant BOOT

Two Flash chips are used to store BOOT software (system boot program) to achieve hardware-level BOOT redundant backup and avoid the failure of the switch to start due to FLASH chip failure.

④

Fiber Port/Fan Module/USB Port Fault Isolation

Fiber port fault isolation: Every two fiber ports, every fan module, and every USB port are isolated to be separately powered to reduce the impact of faulty modules on the entire machine and other fiber modules.

Omada Industrial Easy Managed Switches

Omada Industrial Switches are ideal for industrial Ethernet infrastructure, and uphold the stringent standards that are required for operational reliability in harsh environments.

Introduction to the VIGI Software

VIGI VMS

Professional software system built for centralized management.

VIGI APP

Delicate Design for Lightweight Management Scenarios.

VIGI Security Manager

Powerful and Unified PC Software for SMB Surveillance.

VIGI Device Web

Web portal that comes with device, support to remote access and config the device.

VIGI NVR GUI

Stand-alone Management System Comes with NVR HDMI/VGA Output.

VIGI Config Tool

Lightweight PC Tool for Device discovery and Configuration.

TP-Partner App

Gives TP-Link partners easy access to all product information, promotions, and marketing handouts.

VIGI Calculator

Provides bandwidth, lens, storage calculator for product selection.

VIGI Designer Tool

Offer virtual map for project design, support to export map and device list.

Device OpenAPI

For third-party integration to get live stream, video playback, event list from VIGI IPC and NVR.

Omada central

We provide one-stop solution for enterprise networking and surveillance

Unified Management

Integrates Omada Networking, VIGI Surveillance, Security, and IoT (TBD)* to manage and maintain all devices across sites within a single interface.

*IoT refers to the discovery and management of IoT devices based on the Matter protocol. Security mainly includes SD-WAN, IPS, Firewall, and other security features.

Simple Deployment and Setup

- Assign Different Management Roles
- Automatic Topology Recognition
- Convenient VLAN Assignment

Quick Troubleshooting

- Detect and fix all network and surveillance devices in one system
- 24/7 Intelligent Anomaly Detection
- Integrated Troubleshooting Tools

De ce TP-Link?

- ✓ Echipa dedicata sectorului SMB/Enterprise pentru:
 - Suport Comercial in proiecte:
